- Github
- Bitbucket

Experience

Software Engineer - Innovura , Homs-Syria Arab Republic (Remote)

Jul 2023 - Sep 2023

- Successfully developed part of the user interface for a nursery school website using Next.js.
- Leveraged Tailwind CSS to create visually appealing and responsive designs.
- Designed and implemented a robust PostgreSQL database, creating an Entity Relationship Diagram (ERD) to ensure efficient data management and integrity.
- Utilized Prisma ORM to establish a seamless connection between the website and the PostgreSQL database.
- Initialized and integrated the React Big Calendar library, Implement event management functionality, allowing users to add and manage events within the calendar.
- Leveraged NextAuth for authentication, integrating Google Provider for user authentication and enhancing the security of the website.
- Incorporated Shadcn/ui components into the website, enhancing the user interface with intuitive and visually appealing UI elements.

Front-end Developer - Freelancer ,Homs-Syrian Arab Republic

Dec 2021 - May 2023

- Collaborated with a team in developing a Teaching Institute Management Program using Java and MySQL.
- Collaborated with a team in developing an Android job search app in Java, integrated with Firebase. Enabled users to find jobs conveniently.
- Designed a gym website using React, featuring animations for enhanced user experience.
- Built a React-based cryptocurrency info site using external APIs for real-time data.
- Developed an AI-driven chat platform, allowing interactions with multiple AI models.
- Crafted a weather website using StepZen, GraphQL, Next.js for real-time forecasts.
- Created an e-commerce website using Next.js and Redux for shopping, delivering seamless user experiences and robust state management.
- Developed an e-commerce website for a makeup store, leveraging WordPress, WooCommerce, and Elementor. Designed to showcase products and facilitate seamless purchasing, this website contributed to an enhanced online shopping experience.

Education

Master in Web Science

Syrian Virtual University | Homs, Syria
Jan 2023 - present

Bachelor of Software Engineering GPA: 2.96

Al-Baath University | Homs, Syria
Sep 2015 - Sep 2021

Relevant Coursework: OOP, Data Structures and Algorithms, Database Systems, Software Engineering
Logic Design, Computer , Graphics, Linear Algebra, Digital Signal Processing, Image Processing, Data Analytics

Languages

- **Arabic** (Native)
